**Contracts and Grants Program**

**Project Summary: 03-063-554**

<b>Project Number:</b>	03-063-554	<b>Project Status:</b>	Active	<b>Grant Manager:</b>	M Flores
<b>Project Name:</b>	Calleguas Water Quality Monitoring Program	<b>Project on Schedule:</b>	No		

**Project Details**

<b>Watershed:</b>	Calleguas Creek Watershed	<b>Project Description:</b>	Two year project to implement citizen water monitoring in the Calleguas Creek Watershed to determine the effectiveness of management practices designed to manage nutrient, pesticide and sediment runoff. The project will also quantify the extent of water quality improvement.
<b>Problem Statement:</b>	In the Calleguas Creek Watershed, thirty separate pollutant have been listed on the Clean Water Act Section 303d and yet there is no ongoing citizen water-monitoring program currently in place. Calleguas Creek Watershed drains into Mugu Lagoon, which is one of the few remaining wetlands in Southern California, an Area of Special Biological Significance providing habitat to several endangered species, and also the site of a number of registered Chumash Native American archeological site. The US Navy restricts access to Mugu Lagoon, and so citizen monitoring programs are not in place there either. As a result, there is not enough biological information about these areas to adequately protect them. In addition, the general public in Ventura County remains unaware of the significance of urban runoff and its impact in the quality of local resources.	<b>Outcomes:</b>	Water Quality Monitoring-Data Collection/Education/Outreach; collection of water quality data, establishment of a citizen monitoring group.
